## Metal Bond Diamond Fickerts

Metal Bond Diamond Fickerts are designed to grind rough gangswan slabs. Position 1 - 6 ensure slabs semi honed and perfectly ready for epoxy or polishing.

Automated sintering with advance metal bonding ensure aggressive cutting with minimal wear.

It cut's down grinding time by minimum 20% and guarantees more production in tough operating conditions.

Suits for all modern and old machines like Breton, Predrini Simec, Barasanti, Gaspari and Keda. Products are backed by well qualified experts for any onsite sales after support.

Features	Advantages	Benefits
Automated Sintering	Uniform bonding throughout	Superior & Uniform cutting throughout
Advanced metal bonding	Optimum life with synchronized cutting	Higher speed and lower cost / unit
Universal design	Polish hard, medium and soft materials	No need change, hence more productivity

### Size and ordering information

Size (D/T/H/B)	Product ID	Pack Size	Availability Size
140 Mmm	CUSRDF-140 Positions- 1, 2, 3, 4, 5 and 6	6	Ex Stock

All dimensions are in mm.

**Note : Other sizes and shapes are available on request.**

Due to continues up gradation, the information provided is subjected to change.
